

## MySQL Sample Database Schema

The MySQL sample database schema consists of the following tables:

**Customers:** stores customer's data.

**Products:** stores a list of scale model cars.

**ProductLines:** stores a list of product line categories.

**Orders:** stores sales orders placed by customers.

**OrderDetails:** stores sales order line items for each sales order.

**Payments:** stores payments made by customers based on their accounts.

**Employees:** stores all employee information as well as the organization structure such as who reports to whom.

**Offices:** stores sales office data.
